003. As used in this rule, the term "reserve ratio" is the percentage of the balance in the employer's experience account at the beginning of the year 2004 to the average of the annual payroll by which contributions were measured for the years 2000, 2001, 2002, and 2003. Provided, that for an employer with less than four years of contribution experience, the average payroll will be determined on the basis of the years for which contributions were payable.
